Got a Forestry Problem ?

*Extension Foresters
Can Help.*

How EXTENSION FORESTRY programs work for you...

We serve ...

Who are EXTENSION FORESTERS?

Extension Service foresters provide sound information, backed by basic and applied research in natural resource management and use. Given this information, Americans can manage their field and forest resources to better serve the nation's needs for now and the future.

There is a county agricultural agent in your local Extension office who can help you with your forestry problems. For factual information, he can draw upon the experience and training of the more than 250 Extension foresters throughout the U.S. Most of these professional foresters have Master's degrees; many have doctorates.

Your county agent and Extension foresters are members of the Cooperative Extension Service teams at the state land-grant universities. They are backstopped by more than 20,000 university teachers and research workers in Natural Resources and Agriculture. They also have quick access to other university experts in business management, economics, sociology, home economics, engineering, education and other disciplines.

The Cooperative Extension Service is a three-way partnership between your county, your land-grant university and your U.S. Department of Agriculture. It is dedicated to the principle that well-informed people can make their own decisions and make them well. More than 3,000 Extension offices throughout the nation make up a vast facility for extending knowledge to all Americans.

Safety Check Lists

Safety Clothing

Second Home Plans

Shade Tree Culture

Special Products (Boughs,

Cones, Mulches, Smilax,

Wreaths, etc.)

Tax Information

Timber Management

Timber Sale Contracts

Urban Forestry

Volume Tables

Watershed Protection

Wildlife Habitat

Windbreak Management

Not all of our county agents and foresters can instantly provide information on all of these subjects (like nutritious lunches). But Extension home economists, community development experts, and other co-workers in teaching and research at your land-grant university know something about nearly every subject, or where to find out. And they are glad to help us.

To find your nearest Extension Forester, call your local Extension office. It's probably listed under your county government. Offices are usually located in the courthouse, post office, or other government building in your county seat town. Or you can write to the Director of your State Extension Service at the address below.
